

CACHE MAKERS 

Grand Opening and Ribbon Cutting

Saturday, August 22
1:00 p.m.

990 S Main Suite A

Cache Makers is a 4-H club that allows youth to learn STEM (science, technology, engineering, and math) by doing. Meet current club youth, parents, leaders, and staff while observing demonstrations of the laser cutter, 3D printers, robots, and more. We'll be officially opening registrations for fall afterschool groups, announcing free 2-hour workshops, and giving out prizes. See you there!
